SUPER SALTS™

An electrolyte supplement rehydrating the body to its natural state*

The ultimate body-alkalizing agent, Super Salts™ is a combination of four powerful carbonate salts (sodium bicarbonate, magnesium carbonate, potassium bicarbonate, and calcium carbonate) that help maintain the alkaline design of the human organism.*

Sodium Bicarbonate: Also known as baking soda, is used to relieve heartburn, sour stomach, or acid indigestion by neutralizing excess stomach acid.*

Potassium Bicarbonate: Highly alkaline in nature, it is used as an antacid, electrolyte replenisher and potassium supplement (aiding the heart, blood vessels, nerves, and muscles). May also reduce the risk of high blood pressure, stroke, diabetes, and kidney stones.*

Calcium Carbonate: An inorganic salt primarily used to manage and treat low calcium conditions, GERD, and chronic kidney disease.*

Magnesium Carbonate: Used widely for relief of muscle cramps and gastrointestinal symptoms such as dyspepsia, heartburn, GERD, and constipation.*

Health Benefits: These salts are naturally occurring in all fluids of the body. Specifically, they can aid in the reduction of acidity in the lymphatic, circulatory, and gastro-intestinal systems.*

Supplement Facts

Serving Size: 5 g

Servings Per Container: 100

Amount Per Serving	% Daily Value	
Proprietary Blend	5g	†
Sodium Bicarbonate		†
Potassium Bicarbonate		†
Calcium Carbonate		†
Magnesium Carbonate		†

Recommended Usage:

One (1) scoop (which equals 1 teaspoon) up to 3 times per day mixed with water in either of the following ways:

With 1 liter of water where you can drink it slowly throughout the day.

With 3 oz. of water where you can shoot it quickly at one time.

Recommended Usage if Constipated:

Add one (1) scoop of salts (which equals 1 teaspoon) to three (3) ounces of water and shoot it quickly – follow that with drinking 26 ounces of water within a 10 – 15 minute time period. Repeat this daily until regular bowel movements begin!

NO FILLERS / NON-ALLERGENIC
